MANUSCRIPT DETAILS

TITLE: The Effect of Sustainable Supply Chain towards Sustainability Performance Mediated by Joint Efforts and Sharing Activities:
Evidence Bali Farmer Groups

ABSTRACT:

This research aims to analyze the influence of sustainable supply chains on the performance of farmer groups in the province of Bali, Indonesia. The authors focus on mediating variables that were Joint Efforts and Sharing Activities based on resource dependence theory.

This research data used observations of 214 farmer groups in Bali Province with PLS-SEM analysis.

The critical findings of this study are as follows: (1) sustainable supply chain has a direct effect on sustainability performance; (2) joint efforts and sharing activities concurrently partially mediate the link between sustainable supply chain and sustainability performance. In explicit, farmers' sharing activities are a more vital mediating variable than joint efforts in the researched linkage.

Joint efforts and the sharing of activities have an essential role in supply chain development that encourages farmer groups to collaborate with other supply chain parties in order to achieve sustainability performance.

Sustainable development is the primary goal of the organization, but problems occur in the horticultural supply chain, which is based on economic, environmental and social aspects.

I appreciate your help in accomplishing our goal of having an expedited reviewing process. Please do not hesitate to contact me if I can be of any assistance.

Yours sincerely

Yes

No

*** 1. Originality: Does the paper contain new and significant information adequate to justify publication?**

yes, it does as it shows some kind of sustainability supply chain

*** 2. Relationship to Literature: Does the paper demonstrate an adequate understanding of the relevant literature in the field and cite an appropriate range of literature sources? Is any significant work ignored?**

yes, it does as it shows some kinds of joint efforts, sharing activities, and the performanships

*** 3. Methodology: Is the paper's argument built on an appropriate base of theory, concepts, or other ideas? Has the research or equivalent intellectual work on which the paper is based been well designed? Are the methods employed appropriate?**

super...it shows the understanding of the concept and framework

*** 4. Results: Are results presented clearly and analysed appropriately? Do the conclusions adequately tie together the other elements of the paper?**

SSC is significant in producing sustainability performance and analyzing the potential influence of this sustainable supply chains (economic, environmental, and others) on the sustainability performance of farmers while sharing activities can further motivate organizations to be more honest and fair in managing the products like joint efforts and sharing activities. But to the overall Indonesian agriculture becomes a bit problematic as this talks about 214 farmers only. This is not the majority of farmers

*** 5. Implications for research, practice and/or society: Does the paper identify clearly any implications for research, practice and/or society? Does the paper bridge the gap between theory and practice? How can the research be used in practice (economic and commercial impact), in teaching, to influence public policy, in research (contributing to the body of knowledge)? What is the impact upon society (influencing public attitudes, affecting quality of life)? Are these implications consistent with the findings and conclusions of the paper?**

it satisfies bits and pieces into the manuscript but the overall Indonesian agriculture may be questioned

*** 6. Quality of Communication: Does the paper clearly express its case, measured against the technical language of the field and the expected knowledge of the journal's readership? Has attention been paid to the clarity of expression and readability, such as sentence structure, jargon use, acronyms, etc.**

ok

*** Recommendation**
