## SYLLABUS

---

<b>Date/Revision</b>	21 November 2016
<b>Faculty</b>	Business and Social Sciences
<b>Approval</b>	Dr. Samuel Prasetya

---

### SUBJECT: INVESTMENT ANALYSIS & PORTFOLIO

---

#### 1. Identification of Subject:

Name of Subject	: Investment Analysis & Portfolio
Code of Subject	: INAP-3000
SKS/ECTS	: 3/5
Semester	: 4
Study Program	: MGT/IBA
Lecturer	: Dr. Satiri, MM, MBA

#### 2. Competency

After having the course, students are expected to:

- Develop portfolio analysis
- Understand the models of equilibrium in the capital markets
- Understand the security and portfolio theory
- Be able to evaluate the investment process
- Be able to build work ethic and persistence; empathy for classmates and decision makers; social awareness of the consequences of decisions and the challenging context for decision makers; and accountability for one's work.

#### 3. Description of Subject:

The main topics to be covered are:

- Financial securities
- Financial markets
- The characteristic of opportunity set under risk
- Delineating efficient portfolios
- Techniques for calculating the efficient frontier
- The correlation structure of security returns—the single-index model
- The correlation structure of security returns—multi-index model and grouping techniques
- Simple techniques for determining the efficient frontier
- Estimating expected returns
- How to select among the portfolio in the opportunity set
- International diversification
- Nonstandard forms of capital asset pricing models
- Empirical tests of equilibrium models

- The arbitrage pricing model apt—a multifactor approach to explaining asset prices
- Efficient markets
- The valuation process
- Earnings estimation
- Behavioral finance, investor decision making, and asset prices
- Interest rate theory and the pricing of bonds
- The management of bond portfolios
- Option pricing theory
- The valuation and uses of financial future
- Mutual funds
- Evaluation of portfolio performance
- Evaluation of security analysis
- Portfolio management revisited

#### 4. Learning Approach

Approach : Combination of Expository - inquiry and collaborative  
 Method : Discussion, question answer, sample problem  
 Student Task : Problem Solving, Quiz  
 Media : LCD projector, Black/White Board

#### 5. Evaluation

Maximum absences : 25%  
 Projects (individual & group) : 20 points  
 Presentation : 10 points  
 Quizzes : 10 points  
 Final Examination : 60 points  
 Total : 100 points

#### 6. Contents/Topics of Lecturing

Week	Topics	Content	Remarks
1	<b>Financial securities and Financial markets</b>	<ul style="list-style-type: none"> <li>• Types of marketable financial securities</li> <li>• The return characteristics of alternative security types</li> <li>• Stock market indexes</li> <li>• Bond market indexes</li> <li>• Trading mechanics</li> <li>• Margin and markets</li> <li>• Trade types and costs</li> </ul>	<p>Group formation</p> <p>Group Topic selections for Group writing project</p>
2	<b>The characteristics of the opportunity set under risk &amp; delineating efficient portfolios</b>	<ul style="list-style-type: none"> <li>• Determining the Average Outcome</li> <li>• A Measure of Dispersion</li> <li>• Variance of Combinations of Assets</li> <li>• Characteristics of Portfolios in General</li> </ul>	

Week	Topics	Content	Remarks
		<ul style="list-style-type: none"> <li>• Combinations of Two Risky Assets Revisited: Short Sales Not Allowed</li> <li>• The Shape of the Portfolio Possibilities Curve</li> <li>• The Efficient Frontier with Riskless Lending and Borrowing</li> <li>• Examples and Applications</li> </ul>	
3	<b>Techniques for calculating the efficient frontier &amp; the correlation structure of security returns: the single-index model</b>	<ul style="list-style-type: none"> <li>• Short sales allowed with riskless lending and borrowing</li> <li>• Short sales allowed: no riskless lending and borrowing</li> <li>• Riskless lending and borrowing with short sales not allowed</li> <li>• No short selling and no riskless lending and borrowing</li> <li>• The incorporation of additional constraints</li> <li>• The inputs to portfolio analysis</li> <li>• Single-index models: an overview</li> <li>• Characteristics of the single-index model</li> <li>• Estimating beta</li> <li>• The market model</li> </ul>	<b>Quiz 1</b>
4	<b>The correlation structure of security returns: multi-index models and grouping techniques &amp; simple techniques for determining the efficient frontier</b>	<ul style="list-style-type: none"> <li>• Multi-index models</li> <li>• Average correlation models</li> <li>• Mixed models</li> <li>• Fundamental multi-index models</li> <li>• The single-index model</li> <li>• Security selection with a purchasable index</li> <li>• The constant correlation model</li> <li>• Other return structures</li> </ul>	
5	<b>International diversification &amp; estimating expected returns</b>	<ul style="list-style-type: none"> <li>• The world portfolio</li> <li>• Calculating the return on foreign investments</li> <li>• The risk of foreign securities</li> <li>• Returns from international diversification</li> <li>• The effect of exchange risk</li> <li>• Return expectations and portfolio performance</li> <li>• Other evidence on internationally diversified portfolios</li> </ul>	<b>Quiz 2</b>

Week	Topics	Content	Remarks
		<ul style="list-style-type: none"> <li>• Models for managing international portfolios</li> <li>• Aggregate asset allocation</li> <li>• Forecasting individual security returns</li> <li>• Portfolio analysis with discrete data</li> </ul>	
6	<b>How to select among the portfolios in the opportunity set &amp; the standard capital asset pricing model</b>	<ul style="list-style-type: none"> <li>• Choosing directly</li> <li>• An introduction to preference functions</li> <li>• Risk tolerance functions</li> <li>• Safety first</li> <li>• Maximizing the geometric mean return</li> <li>• Value at risk (VaR)</li> <li>• Utility and the equity risk premium</li> <li>• Optimal investment strategies with investor liabilities</li> <li>• Liabilities and safety-first portfolio selection</li> <li>• Simulations in portfolio choice</li> <li>• The assumptions underlying the standard Capital Asset</li> <li>• Pricing model (CAPM)</li> <li>• The Capital Asset Pricing Model</li> <li>• Prices and the CAPM</li> </ul>	
7	<b>Evaluation from previous discussion and chapters</b>		
8	<b>Semester break</b>		
9	<b>Nonstandard forms of capital asset pricing models &amp; empirical tests of equilibrium models</b>	<ul style="list-style-type: none"> <li>• Short sales disallowed</li> <li>• Modifications of riskless lending and borrowing</li> <li>• Personal taxes</li> <li>• Nonmarketable assets</li> <li>• Heterogeneous expectations</li> <li>• Non-price-taking behavior</li> <li>• Multi-period CAPM</li> <li>• The consumption-oriented CAPM</li> <li>• Inflation risk and equilibrium</li> <li>• The multi-beta CAPM</li> <li>• The models—ex-ante expectations and ex-post tests</li> <li>• Empirical tests of the CAPM</li> <li>• Testing some alternative forms of the</li> </ul>	<b>Draft III</b>

Week	Topics	Content	Remarks
		<p>CAPM model</p> <ul style="list-style-type: none"> <li>• Testing the post-tax form of the CAPM model</li> <li>• Some reservations about traditional tests of general equilibrium relationships and some new research</li> </ul>	
10	<b>The arbitrage pricing model APT—A multifactor approach to explaining asset prices &amp; efficient markets</b>	<ul style="list-style-type: none"> <li>• APT—what is it?</li> <li>• Estimating and testing APT</li> <li>• APT and CAPM</li> <li>• Recapitulation</li> <li>• Some background</li> <li>• Tests of return predictability</li> <li>• Announcement and price return</li> <li>• Methodology of event studies</li> <li>• Strong-form efficiency</li> <li>• Market rationality</li> </ul>	<b>Quiz 3</b>
11	<b>Valuation process &amp; earnings estimation</b>	<ul style="list-style-type: none"> <li>• Discounted cash flow models</li> <li>• Cross-sectional regression analysis</li> <li>• An ongoing system</li> <li>• The elusive number called earnings</li> <li>• The importance of earnings</li> <li>• Characteristics of earnings and earnings forecasts</li> </ul>	
12	<b>Behavioral finance, investor decision making, and asset prices &amp; interest rate theory and the pricing of bonds</b>	<ul style="list-style-type: none"> <li>• Prospect theory and decision making under uncertainty</li> <li>• Biases from laboratory experiments</li> <li>• Summary of investor behavior</li> <li>• Behavioral finance and asset pricing theory</li> <li>• An introduction to debt securities</li> <li>• The many definitions of rates</li> <li>• Bond prices and spot rates</li> <li>• Determining spot rates</li> <li>• The determinants of bond prices</li> </ul>	<b>Quiz 4</b>
13	<b>The management of bond portfolios &amp; option pricing theory</b>	<ul style="list-style-type: none"> <li>• Duration</li> <li>• Protecting against term structure shifts</li> <li>• Bond portfolio management of yearly returns</li> <li>• Swaps</li> <li>• Types of options</li> <li>• Some basic characteristics of option</li> </ul>	

Week	Topics	Content	Remarks
		values <ul style="list-style-type: none"> <li>• Valuation models</li> <li>• Artificial or homemade options</li> <li>• Uses of option</li> </ul>	
14	<b>Evaluation of portfolio performance &amp; evaluation of security analysis</b>	<ul style="list-style-type: none"> <li>• Evaluation techniques</li> <li>• A manipulation-proof performance measure</li> <li>• Decomposition of overall evaluation</li> <li>• Multi-index, apt, and performance evaluation</li> <li>• Mutual fund performance</li> <li>• Why the emphasis on earnings?</li> <li>• The evaluation of earnings forecasts</li> <li>• Evaluating the valuation process</li> </ul>	<b>Quiz 5</b>
15	<b>Review chapters for final exams &amp; group projects</b>		
16	<b>Semester break</b>		
17	<b>Final Examination</b>
