Comments;

1. Based on the scenario planning (analysis on the slide presentation) where by you put the company performance vs transformation, and you choose **plan B** (rapid performance & low company performance) instead of **plan C** (rapid performance & good company performance),
 - a. why did you choose plan B over **plan C** & over **plan D**?
 - b. what are the differences between **plan C** and **plan D**?
2. Scenario B in conclusion but the word "Suzuki" is there
