ACKNOWLEDGEMENT

I learned about Indonesian business perspectives and had an amazing experience learning about business management at IPMI. I have a lot of friends who work professionally. Collaborating with my classmates in class was enjoyable. I encountered lectures who are highly knowledgeable and expert in their disciplines; they all helped me and provided me with a wealth of business viewpoints and insights.

I would like to acknowledge and give my warmest thanks to my supervisor Sidrotun Naim, M.P.A., Ph.D. who made this work possible. Her guidance and advice carried me through all the stages of writing my thesis. I would also like to thank my committee members for letting my defense be an enjoyable moment, and for your brilliant comments and suggestions, thanks to you. The management, faculty members, and staff of IPMI College of Management have also helped me throughout the four semesters and have shared unforgettable knowledge, stories, and experiences.

I would like to thank WOM Finance especially Bpk. Ekanto Wijonosunu who has given me the opportunity to conduct research in this company. Thank you for the motivation and all the support that has been given to get through this challenge.

I would also like to give special thanks to my son Gilbert Platina and my father Lebister Samosir for their continuous support and understanding when undertaking my research and writing my project. Your prayer for me was what sustained me this far.

Finally, I would like to thank God, for letting me through all the difficulties. I have experienced your guidance day by day. You are the one who let me finish my degree. I will keep on trusting You.

I hope my research on this thesis can be useful for all readers.

ABSTRACT

This study examines the implementation of adaptive leadership on employee resilience, engagement, and turnover within the multifinance industry, focusing on PT Wahana Ottomitra Multiartha Tbk. (WOM Finance). The research addresses the challenge of high employee turnover exceeding 25% annually, posing significant risks to organizational stability, operational costs, and productivity. Using a single case study approach, the study investigates how adaptive leadership from the managers such as distinguishes formal authority, and informal leadership can mobilize resources to face tough challenges and encourage their team to solve problems instead of leaving them and listening to their teams even from the lowest level of position. Adaptive Leadership behaviour is also demonstrated when Branch Managers can differentiate technical challenges from adaptive challenges so that leaders can engage all teams by encouraging problem solving through collaboration and coaching their teams to find different perspectives in creative and innovative ways and also can increase employee resilience and engagement, which ultimately reduces employee turnover rates. In-depth interviews with Branch Managers and Function Head level at WOM Finance reveal key insights into how adaptive leadership fosters collaboration, problem-solving, and employee retention. The findings highlight Adaptive leadership in Branch Managers at WOM Finance reduces employee turnover by fostering collaboration, empowerment, and innovation, leading to a more stable workforce. Additionally, employee engagement plays a crucial role in retention, while resilience alone is insufficient, and factors like organizational fit and work environment also influence turnover. The study provides strategic recommendations for multifinance companies to enhance workforce retention and performance through effective leadership practices.

Keywords: Adaptive Leadership, Employee Resilience, Employee Engagement, Employee Turnover, Descriptive Qualitative Single Case Study.
